36. Please provide your perspective of technology trends for anyone of the following and describe with a minimum of 100 words *

Big Data, Mobile Computing, Cloud Computing, Artificial Intelligence / Machine Learning, IoT or any other (Specify)

Cloud computing continues to shape the technological landscape, becoming increasingly indispensable for businesses and individuals alike. This trend shows no signs of slowing down as we move forward. The convenience and flexibility offered by cloud services enable seamless storage, accessibility, and processing of data and applications across various devices. Multi-cloud and hybrid cloud strategies are gaining traction, allowing organizations to optimize costs, performance, and security by distributing workloads. Serverless computing, a paradigm within cloud computing, streamlines application deployment and scaling, minimizing the need for managing underlying infrastructure. As data privacy and security concerns persist, advancements in encryption, authentication, and compliance measures are enhancing the trustworthiness of cloud platforms.
